Professional Land Surveyor

The Bozeman, Montana regional office of TD&H Engineering has an immediate opportunity for a Licensed Land Surveyor.

Applicants must possess the knowledge and experience necessary to plan, organize, and engage in land surveying to determine precise location and measurements of points, elevations, lines, areas, and contours for construction, map making, land division, titles, mining, construction staking, and other purposes. Experience with legal property research and the ability to work with minimal supervision are necessary. Experience working with AutoCAD is required and experience with Trimble equipment (such as GPS, total stations, data collectors, and the like) is desired. Travel, and overnight travel at times, may be required. Starting wage range for this position is \$28-\$38/hour and will be dependent on experience and abilities. Professional licensure in the State of Montana (or the ability to quickly get licensed in Montana) is required.

TD&H Engineering is a mid-sized civil/structural/geotechnical engineering firm with offices in Idaho, Washington, Montana, North Dakota, and Pennsylvania. We provide a professional work environment, comprehensive compensation and benefits package, and opportunities for advancement, ownership, and continuing education. TD&H is proud to be an equal opportunity employer.

To apply, submit your resume, cover letter, and a minimum of three references that have knowledge of your professional qualifications to human.resources@tdhengineering.com
This position will be open until filled. No phone inquiries please.
