

## Position Opening: Project Surveyor

Jorgensen Associates, Inc. is looking for an experienced Project Surveyor to join our team in Jackson or Pinedale, WY. Hybrid/remote schedules may be available, if willing to occasionally travel to the Jackson area. Registration as a PLS required, with demonstrated expertise in project management and the principles and practices of surveying. Leadership and survey management experience a strong plus. Full-time position includes competitive wages, 3 weeks PTO, comprehensive benefits package, & discounted ski pass options.

**Position Title:** Project Surveyor

**Location:** Jackson, WY or Pinedale, WY | Remote/Hybrid potential

### Position Summary:

Under the general supervision of senior surveying staff, this position will manage project teams and perform responsible surveying work that deliver surveying solutions to our clients on time, within budget, and which consistently exceed the clients' expectations. Responsible for all aspects of project work, including but not limited to: project management, project scope, determining methods and procedures for establishing or reestablishing survey control, preliminary research, and ensuring Quality Assurance/Quality Control. Responsible to ensure accurate notes, records, and sketches are produced to describe and certify work performed, as well as prepare and maintain a variety of technical records and write reports of a complex technical nature. Assume statutory responsibility for work performed.

### Qualifications:

Bachelor's Degree in Land Surveying from an accredited four-year college or university. Four years post-graduate experience in land surveying, including supervisory experience, or a Master's Degree and typically three to six years post-graduate experience. Registration as a Professional Land Surveyor. Thorough knowledge of effective legal practices, methods, techniques, and equipment of land surveying. Considerable local knowledge of plats, plans, maps, deeds, and local geography. Complete working knowledge of AutoCAD, Windows-based applications, and surveying software as appropriate. Must have excellent judgment, leadership, and communication skills. Possession of a valid driver's license required.
