

Professional Land Surveyor

Sidney, MT

Summary

Interstate Engineering, a regional engineering consulting firm, is seeking a Professional Land Surveyor. Our company's growth has created an exciting opportunity for the right candidate to thrive in a collaborative culture alongside an empowered employee-owner team.

As a Professional Land Surveyor, you will work with a multi-disciplined land-surveying and civil engineering group whose focus varies from private individuals and companies to federal, state, and tribal government entities. You will be responsible for legal research, use of GPS and robotic instruments and related software, and build on your experiences by using your adept knowledge in working with various regulations for municipal agencies and private industries. As a team leader, you will perform and oversee surveying activities such as boundary surveys, topographic surveys, construction staking, and GIS mapping; supervise, mentor and train survey technicians to develop their survey capabilities; supervise and be responsible for survey work performed by your team; contribute to company success by further developing professional relationships and growing clientele; and assist in expanding the firm's survey practice by performing successful project outcomes that benefit our clients.

Knowledge of the Following Preferred

- Experience with Public Land Surveying System
- Experience with Montana Platting
- Experience with surveys to satisfy FEMA requirements
- Experience with DOT surveying

Required Qualifications

- Registered Land Surveyor in Montana or North Dakota or ability to obtain within six months
- Associate Degree in Surveying or related engineering program
- Minimum of six years of experience in surveying
- Strong problem-solving skills and mechanical aptitude skills
- The capability of supervising, mentoring, and evaluating staff
- Exceptional communication and interpersonal skills
- The ability to work in a team atmosphere is vital
